

A series of 12 dot patterns arranged in a single row, representing the digits 0 through 9 and a final pattern. The patterns are as follows:

- 0: A 3x3 grid with the center dot missing.
- 1: A 3x3 grid with the center dot and the two dots in the middle row.
- 2: A 3x3 grid with the center dot and the two dots in the top row.
- 3: A 3x3 grid with the center dot and the two dots in the bottom row.
- 4: A 3x3 grid with the center dot and the two dots in the left column.
- 5: A 3x3 grid with the center dot and the two dots in the right column.
- 6: A 3x3 grid with the center dot and the two dots in the top-left and bottom-right positions.
- 7: A 3x3 grid with the center dot and the two dots in the top-right and bottom-left positions.
- 8: A 3x3 grid with the center dot and the two dots in the top-left and top-right positions.
- 9: A 3x3 grid with the center dot and the two dots in the top-right and bottom-right positions.
- Final pattern: A 3x3 grid with the center dot and the two dots in the top-left and bottom-left positions.

The image shows five Braille dot patterns arranged horizontally. From left to right, they represent the numbers 1, 2, 3, 4, and 5. Each pattern consists of a 2x3 grid of dots.

The figure consists of eight sub-diagrams arranged in two rows of four. Each sub-diagram shows a set of points (dots) in a 2D plane. The points are colored: red, green, blue, and yellow. The sequence shows the points moving and changing color over time, with some points appearing to be 'born' or 'die'.

- Diagram 1 (top left): 5 points (3 red, 2 green).
- Diagram 2 (top second): 6 points (3 red, 2 green, 1 blue).
- Diagram 3 (top third): 7 points (3 red, 2 green, 2 blue).
- Diagram 4 (top right): 8 points (3 red, 2 green, 3 blue).
- Diagram 5 (bottom left): 9 points (3 red, 2 green, 4 blue).
- Diagram 6 (bottom second): 10 points (3 red, 2 green, 5 blue).
- Diagram 7 (bottom third): 11 points (3 red, 2 green, 6 blue).
- Diagram 8 (bottom right): 12 points (3 red, 2 green, 7 blue).
