

A large grid of 100 rows and 100 columns of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The dots are small and black, and the background is white. The pattern is roughly rectangular, with the dots concentrated in the center and fewer dots towards the edges. The dots are arranged in a way that suggests a random or semi-random distribution, but with some underlying structure or pattern. The dots are of uniform size and color, and the grid is perfectly square. The dots are scattered across the entire grid, with some rows having no dots at all and some rows having many dots. The overall effect is a complex, abstract pattern of black dots on a white background.

This image displays a 10x10 grid of 100 small, square panels. Each panel contains a unique pattern of black dots on a white background. The patterns are highly varied, ranging from sparse, isolated dots to dense, interconnected clusters. Some patterns form recognizable shapes, while others are more abstract and random. The overall effect is a rich, textured mosaic of dot-based designs.
