

The image displays a 100x100 grid of black dots on a white background. The dots are arranged in a sparse, banded pattern. The main diagonal is the most prominent feature, with dots appearing at regular intervals. There are also clusters of dots along the upper and lower diagonals, indicating a banded structure. The density of dots is higher in the lower-left and upper-right quadrants, suggesting a non-uniform distribution of data points or a specific pattern in the underlying data being represented.

The image displays a 12x12 grid of black dots on a white background. The dots are arranged in a pattern that suggests a banded or block-like structure, with some non-zero entries scattered throughout the grid. The dots are arranged in a pattern that suggests a banded or block-like structure, with some non-zero entries scattered throughout the grid.

A 3x3 grid of dots. The top row has two dots, the middle row has two dots, and the bottom row has two dots. The dot in the top-right position is missing.
