A large grid of 20 rows and 100 columns of black dots on a white background. The dots are arranged in a regular, repeating pattern across the grid, forming a sparse matrix. The pattern consists of small clusters of dots that repeat horizontally and vertically, creating a textured, grid-like appearance. The dots are small and black, set against a plain white background.

[illegible]

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s). The patterns are arranged in a grid where the first column represents the first digit, the second column the second digit, and so on, up to the tenth column representing the tenth digit. Each row represents a unique 10-bit binary number from 0000000000 to 1000000000.
