

A complex black and white dot pattern, likely a stylized representation of a face or a decorative element, composed of numerous small dots arranged in a grid-like fashion. The pattern is dense and intricate, with various shapes and sizes of dots forming a larger, abstract figure. The overall effect is a high-contrast, pixelated image that could be interpreted as a stylized face or a decorative motif.

The image displays a 7x10 grid of 70 small clusters of black dots. Each cluster is composed of a small number of dots (ranging from 2 to 10) arranged in various patterns. These patterns include simple shapes like lines, L-shapes, and small squares, as well as more complex, abstract arrangements. The dots are black and the background is white, creating a high-contrast visual field.

The diagrams illustrate the construction of a 5x5 grid of dots. Each diagram shows a different stage of the grid being filled, from a single dot to the complete 5x5 grid.
