

A 10x10 grid of 100 small clusters of black dots, each cluster representing a different number from 0 to 99. The clusters are arranged in a grid where the first two digits of a two-digit number determine the row and the last two digits determine the column. For example, the cluster for 00 is at the top-left, and the cluster for 99 is at the bottom-right.

A 10x10 grid of 100 small clusters of black dots. Each cluster is a unique pattern of dots, varying in shape and size. The dots are arranged in a way that suggests a random or semi-random distribution of these small groups across the grid.
