

A large grid of 100 rows and 100 columns of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The dots are small and black, and the background is white. The pattern is dense in some areas and sparse in others, creating a complex, abstract visual structure.

A 10x10 grid of 100 small dot patterns. Each pattern is a 5x5 arrangement of dots, where the presence or absence of a dot at a specific position represents a binary digit (0 or 1). The patterns are arranged in rows and columns, with each row and column containing 10 unique patterns. The patterns are generated by a simple algorithm, resulting in a diverse set of visual representations for each of the 100 possible combinations of 10 binary digits.
