

A 10x10 grid of 100 small clusters of black dots, each cluster representing a different number from 0 to 99. The clusters are arranged in a grid where the first two digits of a two-digit number determine the row and the last two digits determine the column. For example, the cluster for 0 is at the top-left, and the cluster for 99 is at the bottom-right.

The figure shows a 4x4 grid of dots. The dots are arranged in a pattern that suggests a banded structure, with some non-zero entries highlighted in a specific pattern.

A 3x3 grid of dots. The dots are located at the following positions (row, column): (1,1), (1,2), (2,1), (2,2), (2,3), (3,1), and (3,2). The positions (1,3) and (2,3) are empty.
