

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s). The patterns are arranged in rows and columns, with each row containing 10 patterns and each column containing 10 patterns. The patterns are created by placing black dots on a white background, with the number of dots in each of the 10 positions corresponding to a binary digit. The patterns are arranged in a way that each row and column contains a unique set of patterns, representing all possible combinations of 10 binary digits.
