

The image displays a 7x10 grid of 70 small dot patterns. Each pattern is a 3x3 arrangement of dots, where each dot is either present or absent, representing a unique combination of the seven basic dot patterns (1-7) defined in the legend. The patterns are arranged in rows and columns, showing all possible combinations of the seven basic patterns.

The image shows three distinct dot patterns. The first pattern, representing the number 1, consists of 10 dots arranged in a vertical column with a single dot to the right of the middle. The second pattern, representing the number 2, consists of 10 dots arranged in a horizontal row with a single dot above the middle. The third pattern, representing the number 3, consists of 10 dots arranged in a horizontal row with a single dot above the middle and a single dot below the middle.

The image shows three distinct dot patterns. The first pattern, representing the number 1, consists of 10 dots arranged in a roughly vertical column. The second pattern, representing the number 2, consists of 10 dots arranged in a horizontal row. The third pattern, representing the number 3, consists of 10 dots arranged in a shape resembling a stylized '3'.

A 4x10 grid of 40 small clusters of black dots. Each cluster represents a different pattern of points, likely generated from a random process. The patterns vary in size, shape, and density, showing a wide range of possible outcomes from a single trial.

The image shows three distinct dot patterns. The first pattern, representing the number 1, consists of 10 dots arranged in a vertical column with a single dot to the right of the middle. The second pattern, representing the number 2, consists of 10 dots arranged in a horizontal row with a single dot above the middle. The third pattern, representing the number 3, consists of 10 dots arranged in a horizontal row with a single dot above the middle and a single dot below the middle.
