

A 10x10 grid of 100 small clusters of black dots, each cluster representing a different number from 0 to 9. The clusters are arranged in a grid where the first row shows numbers 0-9, the second row shows 10-19, and so on, up to the tenth row showing 90-99. Each cluster is a unique arrangement of dots, with some numbers having multiple representations (e.g., 0, 1, 4, 6, 8, 9).

The image displays a 12x12 grid of black dots on a white background. The dots are arranged in a pattern that suggests a sparse matrix, likely representing a discretized system. The distribution of dots is not uniform; it shows a higher density along the main diagonal and some off-diagonal elements, particularly in the lower-left and upper-right quadrants, which is characteristic of a banded matrix. The overall pattern is symmetric about the main diagonal, indicating a Hermitian or symmetric matrix. The dots are small and black, and the grid is perfectly square.

[illegible]

Age Group	Male (Black Dots)	Female (White Dots)
18-24	1	2
25-34	2	3
35-44	3	4
45-54	4	5
55-64	5	6
65-74	6	7
75-84	7	8
85-94	8	9

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in a 2x5 grid of dots. The patterns are organized into 10 rows and 10 columns, with each row and column containing a different set of patterns. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number.

A 2xN grid of dots representing a binary sequence. The top row has 15 dots and the bottom row has 15 dots. The sequence of dots from left to right is: (1,1), (1,2), (2,1), (1,1), (1,2), (2,1), (2,2), (1,1), (1,2), (2,1), (2,2), (1,1), (1,2), (2,1), (2,2).

The figure consists of 10 small diagrams arranged horizontally, each showing a pattern of black dots on a grid. The patterns evolve from left to right, starting with a single dot and growing into a complex, branching structure.

A 4x10 grid of 40 small clusters of black dots, each representing a different number from 1 to 40. The clusters are arranged in four rows and ten columns, with the number of dots in each cluster corresponding to its numerical value.

The figure consists of 10 sub-diagrams arranged horizontally, each showing a pattern of black dots on a white grid. The patterns evolve from left to right, starting with a small cluster of dots and growing into a more complex, branching structure.
