

The image displays a 20x20 grid of black dots on a white background. The dots are arranged in a pattern that suggests a banded or block-like structure, with some rows and columns having more dots than others. The overall distribution is sparse, with many empty cells. The dots are arranged in a way that suggests a banded or block-like structure, with some rows and columns having more dots than others. The overall distribution is sparse, with many empty cells.

The image displays a 15x15 grid of black dots on a white background. The dots are arranged in a pattern that suggests a banded or block-like structure, with some non-zero entries scattered throughout the grid. The pattern is not strictly diagonal, but shows a concentration of dots along the main diagonal and some off-diagonal elements, particularly in the upper and lower triangular regions. This visual representation likely corresponds to a sparse matrix used in a numerical or scientific computation.
