

The image displays a 20x20 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, suggesting a complex, non-random distribution. The pattern is denser in some areas and sparser in others, with a notable concentration of dots in the upper right quadrant and a more sparse area in the lower left. The overall appearance is that of a stylized image or a specific data set represented by the positions of the dots.

[illegible][illegible]

A 3x3 grid of dots. The top row has three dots. The middle row has two dots, with the rightmost position empty. The bottom row has two dots, with the rightmost position empty.
