

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in a 2x5 grid of dots. The patterns are organized into four groups of 25, corresponding to the four quadrants of the 10x10 grid. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number.

| Age Group | Male | Female |
|-----------|------|--------|
| 18-24     | 10   | 10     |
| 25-34     | 20   | 20     |
| 35-44     | 30   | 30     |
| 45-54     | 40   | 40     |
| 55-64     | 50   | 50     |
| 65-74     | 60   | 60     |
| 75-84     | 70   | 70     |
| 85+       | 80   | 80     |

• •

A 7x10 grid of 70 small clusters of black dots. Each cluster represents a different pattern of dot distribution, ranging from a single dot to a 3x3 square. The patterns are arranged in a grid that is 7 rows high and 10 columns wide.

A 4x10 grid of 40 small clusters of black dots. Each cluster is a unique arrangement of dots, ranging from a single dot to a group of up to 10 dots. The patterns are abstract and do not form recognizable letters or symbols.

A 3x3 grid of dots. The top row has two dots. The middle row has two dots. The bottom row has one dot on the left and one dot on the right, with the center position empty.

The sequence shows a pattern of black dots on a grid. The pattern starts as a small cluster of dots and grows into a larger, more complex shape, resembling a stylized 'S' or a specific letterform. The dots are arranged in a way that suggests a sequence of steps or a process of growth.

The figure consists of 10 sub-diagrams arranged horizontally, each showing a pattern of black dots on a grid. The patterns evolve from left to right, starting with a small cluster of dots and growing into a more complex, branching structure.

The figure consists of eight sub-diagrams arranged horizontally, each showing a set of points (dots) on a grid. The points are black dots. The sequence shows a cluster growing from left to right. The first diagram has 4 points. The second has 6 points. The third has 8 points. The fourth has 10 points. The fifth has 12 points. The sixth has 14 points. The seventh has 16 points. The eighth has 20 points. The points are arranged in a way that suggests a branching or fractal-like growth pattern.

[illegible]

A 3x3 grid of dots. The dots are located at the following positions (row, column): (1,1), (1,2), (1,3), (2,1), (2,2), (2,3), (3,1), (3,2), (3,3).
