

This image displays a 20x100 grid of Braille characters. The grid is organized into 20 rows and 100 columns. Each cell in the grid contains a Braille character, which is a pattern of six dots arranged in two columns of three. The characters are distributed across the grid in a way that represents a specific Braille text, though the exact meaning is not discernible from this visual representation alone. The grid is a visual representation of a Braille document, showing the spatial arrangement of the characters.

The image displays a 12x12 grid of 144 small dot patterns. Each pattern is a unique combination of 12 binary digits (0s and 1s). The patterns are arranged in a grid where each row and column contains all possible combinations of the 12 bits. The patterns are arranged in a grid where each row and column contains all possible combinations of the 12 bits.

A 3x3 grid of dots forming a triangle. The top row has 3 dots, the middle row has 2 dots, and the bottom row has 1 dot.
