

The image displays a 20x20 grid of black dots on a white background. The dots are arranged in a pattern that suggests a sparse matrix, possibly representing a banded or block-like structure. The dots are concentrated in certain rows and columns, with some non-zero entries scattered throughout the grid. The overall pattern is symmetric, indicating a symmetric matrix. The dots are arranged in a way that suggests a banded or block-like structure, with some non-zero entries scattered throughout the grid.

A 10x10 grid of 100 small clusters of black dots, each cluster representing a different number from 0 to 99. The clusters are arranged in a grid where the first column shows numbers 0-9, the second column shows 10-19, and so on, up to the tenth column showing 90-99. Each cluster is a unique pattern of dots, with some numbers having a single dot and others having many dots in various arrangements.

A 10x10 grid of 100 small clusters of black dots, each cluster representing a different number from 0 to 99. The clusters are arranged in a way that visually represents the numbers, with some clusters being more complex than others. The grid is labeled with numbers 0 to 99 on the left side.
