

The image displays a 16x16 grid of 256 small clusters of black dots. Each cluster represents a unique 4x4 arrangement of dots, where each dot is either present or absent in a specific position. The clusters are arranged in a grid where the first column shows the first 16 clusters, the second column shows the next 16, and so on, up to the 16th column which shows the last 16 clusters. The clusters vary in density and pattern, representing all possible 4x4 dot configurations.

A 20x20 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, forming a grid of small, irregular shapes. The pattern is dense in the center and sparse towards the edges. The dots are arranged in a way that suggests a grid of small, irregular shapes, possibly representing a stylized letter or a decorative element. The pattern is dense in the center and sparse towards the edges.

• • •

A 3x3 grid of dots. The top row has two dots, the middle row has three dots, and the bottom row has two dots. The dot in the top-right position is missing.
