

A large grid of 100 rows and 100 columns of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The dots are small and black, and the background is white. The pattern is dense in some areas and sparse in others, creating a complex, abstract visual structure.

The image displays a 100x100 grid of black dots on a white background. The dots are arranged in a sparse, structured pattern, characteristic of a matrix representation. The distribution of dots is not uniform; it shows a higher density along the main diagonal and some off-diagonal elements, suggesting a banded or block-like structure. The dots are small and black, and the overall layout is rectangular, matching the 100x100 dimensions specified in the prompt.

A 3x3 grid of dots. The top row has two dots, the middle row has two dots, and the bottom row has two dots. The dot in the bottom-left position is missing, leaving a gap.

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in a 2x5 grid of dots. The patterns are organized into four groups of 25, corresponding to the four quadrants of the 10x10 grid. The patterns are arranged in a way that they represent all possible combinations of 10 binary digits, from 0000000000 to 1111111111.
