

This image displays a 16x16 grid of 256 small clusters of black dots on a white background. Each cluster is a unique arrangement of dots, representing a specific character or symbol. The clusters are organized into a grid where each row and column contains 16 distinct patterns. The patterns vary in complexity, from simple single dots to more complex shapes resembling letters or symbols. The overall effect is a dense, structured array of visual information, where each cluster's dot configuration corresponds to a specific character in a 256-character set.
