A 5x10 grid of 50 small, irregular black shapes, resembling a noisy or corrupted version of a 5x10 grid of dots. The shapes are scattered across the grid, with some appearing as single dots and others as small clusters or elongated marks.

The figure consists of 10 sub-diagrams arranged horizontally, each showing a pattern of black dots on a white grid. The patterns evolve from left to right, starting with a small cluster of 4 dots and growing into a larger, more complex shape with multiple branches and internal structure.

The figure consists of eight sub-diagrams, each showing a set of points in a 2D coordinate system. The points are represented by small black dots. The configurations are as follows:

- 1. A single point at the top left.
- 2. A vertical line of three points.
- 3. A set of points forming a small cluster on the left.
- 4. A set of points forming a small cluster on the right.
- 5. A set of points forming a small cluster in the center.
- 6. A set of points forming a small cluster on the left.
- 7. A set of points forming a small cluster on the right.
- 8. A set of points forming a small cluster in the center.

The image displays a 10x10 grid of 100 small, irregular black dot patterns. Each pattern is a unique arrangement of dots, resembling a stylized or abstract representation of a character in a Braille-like system. The patterns are arranged in 10 rows and 10 columns, with each row containing 10 patterns and each column containing 10 patterns. The dots are black and vary in size and position, creating a diverse set of visual symbols.

A 5x10 grid of 50 small clusters of black dots. Each cluster is a unique arrangement of dots, creating a variety of abstract shapes and patterns. The dots are small and black, set against a white background. The patterns range from simple horizontal or vertical lines to more complex, interconnected shapes.

A 3x3 grid of dots. The top row has three dots. The middle row has three dots. The bottom row has two dots, with the leftmost position empty.
