

The image displays a 100x100 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, suggesting a complex, non-random structure. The dots are organized into a grid where each row and column contains a sequence of dots, with some rows and columns being more densely populated than others. The overall pattern is reminiscent of a sparse matrix or a complex data visualization, such as a heatmap or a network graph. The dots are arranged in a way that suggests a specific data set or a visual encoding of text, but the exact meaning is not clear from the image alone.

A 20x20 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The dots are small and black, and the grid is composed of 20 rows and 20 columns. The pattern of dots is not uniform, with some areas being denser than others. The dots are scattered across the grid, with some rows having no dots at all. The overall appearance is that of a random or semi-random distribution of points.

A 3x3 grid of black dots. The dots are located at the following positions (row, column): (1, 2), (1, 3), (2, 2), (3, 1), and (3, 2).
