

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s). The patterns are arranged in a 10x10 grid, with each row and column containing 10 distinct patterns. The patterns are created by placing black dots on a white background, with the number of dots in each of the 10 positions corresponding to the binary value of that digit. The patterns are arranged in a 10x10 grid, with each row and column containing 10 distinct patterns. The patterns are created by placing black dots on a white background, with the number of dots in each of the 10 positions corresponding to the binary value of that digit.

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a 10x10 grid of dots, where each dot is either present (1) or absent (0). The patterns are arranged in a grid where each row and column contains a unique set of patterns, representing all possible combinations of 10 binary digits. The patterns are arranged in a grid where each row and column contains a unique set of patterns, representing all possible combinations of 10 binary digits.

• •

A 3x3 grid of dots. The top row has three dots. The middle row has two dots, with the rightmost position empty. The bottom row has two dots, with the leftmost position empty.
