

The image displays a 100x100 grid of black dots on a white background. The dots are arranged in a pattern that resembles a sparse, irregular grid. Each row contains a varying number of dots, ranging from approximately 10 to 30. The dots are small and black, and the grid is composed of 100 rows and 100 columns. The pattern of dots is not uniform, with some rows having more dots than others, and the dots are scattered across the grid in a way that suggests a random or semi-random distribution.

A 10x10 grid of 100 small clusters of black dots, each cluster representing a different number from 0 to 99. The clusters are arranged in a grid where the first column shows numbers 0-9, the second column shows 10-19, and so on, up to the tenth column showing 90-99. Each cluster is a unique pattern of dots, with some numbers having a single dot and others having many dots in various arrangements.
