

The image displays a large grid of 20 rows and 100 columns of black dots on a white background. The dots are arranged in a pattern that suggests a banded structure, with higher density along the main diagonal and some off-diagonal elements. The pattern is irregular, with some rows having more dots than others. The dots are arranged in a way that suggests a sparse matrix, possibly representing a graph or a system of equations. The overall appearance is that of a large, sparse matrix with a banded structure.

The image shows three distinct dot patterns. The first pattern consists of 10 dots arranged to form the number '1'. The second pattern consists of 12 dots arranged to form the number '2'. The third pattern consists of 15 dots arranged to form the number '3'.

A 3x3 grid of dots. The dots are located at the following positions (row, column): (1,1), (1,2), (1,3), (2,1), (2,2), (2,3), (3,1), (3,2), (3,3). The dots are arranged in a sparse pattern, with some cells empty.
