

The image displays a 12x12 grid of black dots on a white background. The dots are arranged in a pattern that suggests a banded or block-like structure, with some non-zero entries along the main diagonal and off-diagonal bands. The distribution of dots is sparse, with many empty cells, indicating a matrix with a high degree of sparsity. The pattern of dots is consistent across the grid, suggesting a regular or structured distribution of non-zero elements.

A 3x3 grid of dots. The top row has two dots, the middle row has two dots, and the bottom row has two dots. The dot in the top-right position is missing.
