

The image displays a 20x20 grid of 400 small clusters of black dots on a white background. Each cluster is a unique arrangement of dots, representing a specific 20-bit binary sequence. The clusters are arranged in a grid where each row and column contains 20 different patterns. The patterns are generated by a cellular automaton rule, likely Rule 30, which is a common method for creating complex, chaotic patterns from simple initial conditions.
