

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique 10-bit binary code, represented by a set of black dots on a white background. The patterns are arranged in rows and columns, with each row containing 10 patterns and each column containing 10 patterns. The patterns are composed of black dots on a white background, with the number of dots in each pattern corresponding to the number of 1s in the binary code it represents. The patterns are arranged in a way that they can be read as a 10x10 grid of 100 small dot patterns, each representing a unique 10-bit binary code.
