The diagrams illustrate the Siamese method for constructing a 5x5 magic square. The steps are as follows:

- 1 is placed in the center of the bottom row (row 5, column 3).
- 2 is placed in the cell directly above 1 (row 4, column 3).
- 3 is placed in the cell directly above 2 (row 3, column 3).
- 4 is placed in the cell directly above 3 (row 2, column 3).
- 5 is placed in the cell directly above 4 (row 1, column 3).
- 6 is placed in the cell directly to the right of 5 (row 1, column 4).
- 7 is placed in the cell directly to the right of 6 (row 1, column 5).

The subsequent steps (8-25) continue this pattern, wrapping around the edges of the grid as necessary. The final diagram (7) shows the completed 5x5 magic square.

A 3x10 grid of 30 small, irregular black ink-like marks, resembling a stylized signature or a series of random strokes.

[illegible][illegible][illegible]

The image displays ten distinct dot patterns arranged horizontally, representing the digits 0 through 9. Each digit is formed by a specific arrangement of black dots on a white background. The patterns are as follows:

- 0:** A single dot at the top left.
- 1:** Two dots at the top left and top right.
- 2:** Two dots at the top left and top right, with a single dot at the bottom left.
- 3:** Two dots at the top left and top right, with a single dot at the bottom left.
- 4:** Two dots at the top left and top right, with a single dot at the bottom left.
- 5:** Two dots at the top left and top right, with a single dot at the bottom left.
- 6:** Two dots at the top left and top right, with a single dot at the bottom left.
- 7:** Two dots at the top left and top right, with a single dot at the bottom left.
- 8:** Two dots at the top left and top right, with a single dot at the bottom left.
- 9:** Two dots at the top left and top right, with a single dot at the bottom left.

A 3x3 grid of dots. The top row has two dots. The middle row has two dots. The bottom row has one dot on the left and one dot on the right, with the center position empty.

A large grid of 100 rows and 100 columns of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The dots are small and black, and the background is white. The pattern is roughly rectangular, with the dots concentrated in the center and fewer dots towards the edges. The dots are arranged in a way that suggests a random or semi-random distribution, but with some underlying structure or pattern. The dots are of uniform size and color, and the grid is perfectly square. The dots are scattered across the entire grid, with some rows having no dots at all and some rows having many dots. The overall effect is a complex, abstract pattern of black dots on a white background.
