

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s). The patterns are arranged in a grid where each row and column contains all possible combinations of the 10 digits. The patterns are arranged in a grid where each row and column contains all possible combinations of the 10 digits. The patterns are arranged in a grid where each row and column contains all possible combinations of the 10 digits.

A 3x3 grid of dots forming a triangle. The top row has 3 dots, the middle row has 2 dots, and the bottom row has 1 dot.
