

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in a 2x5 grid of dots. The patterns are organized into four groups of 25, each corresponding to a specific 4-bit binary value (0000, 0001, 0010, 0011) in the first four bits of the 10-bit sequence. The patterns are arranged in a way that allows for easy identification of the binary value represented by each group.
