

The image displays a 20x10 grid of Braille characters. Each row contains 10 characters, and there are 20 rows in total. The characters are arranged in a regular grid, with each character occupying a single cell. The Braille characters are composed of dots 1 through 6, arranged in various combinations to form a complete set of 200 unique symbols. The grid is organized such that each character is a unique combination of the 20 possible Braille cell patterns, representing a full set of 200 distinct Braille characters.

A 3x3 grid of dots. The top row has two dots, the middle row has two dots, and the bottom row has two dots. The dot at the bottom-left position is missing.
