

The image displays a 6x10 grid of 60 small clusters of black dots. Each cluster represents a unique pattern of dot distribution, ranging from a single dot to a 3x3 grid. The patterns are arranged in a systematic manner, likely representing a sequence of all possible dot configurations within a 3x3 grid, excluding the empty set. The clusters are arranged in rows and columns, with each row containing 10 clusters and each column containing 6 clusters. The patterns are as follows:

A 6x10 grid of 60 small clusters of black dots. Each cluster is a unique arrangement of dots, ranging from a single dot to a small group of up to 10 dots. The patterns are abstract and vary significantly in shape and size across the grid.

The figure consists of two dot plots side-by-side. The left plot has a horizontal axis labeled 'Number of children' with values 0, 1, 2, 3, 4, 5, 6. There are 2 dots at 0, 3 dots at 1, 5 dots at 2, 2 dots at 3, 1 dot at 4, and 1 dot at 5. The right plot has a horizontal axis labeled 'Number of children' with values 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10. There are 1 dot at 0, 1 dot at 1, 2 dots at 2, 4 dots at 3, 3 dots at 4, 1 dot at 5, 1 dot at 6, 1 dot at 7, 1 dot at 8, 1 dot at 9, and 1 dot at 10.

A 3x3 grid of dots. The top row has two dots in the first and second positions. The middle row has one dot in the first position. The bottom row has two dots in the first and second positions. The dot in the top-right position is missing.
