

The image displays a 10x10 grid of 100 small square plots. Each plot contains a unique arrangement of black dots on a white background. The dots are organized into various patterns, including horizontal lines, vertical lines, clusters, and more complex, irregular shapes. The density and distribution of dots vary significantly across the different plots, illustrating a wide range of possible dot configurations.

The image displays a 10x10 grid of 100 small clusters of black dots on a white background. Each cluster is a unique arrangement of dots, representing a different number from 0 to 99. The clusters are arranged in rows and columns, with the first row containing clusters for numbers 0-9 and the second row containing clusters for numbers 10-19, and so on. The clusters are arranged in a way that they are easy to distinguish from each other, and they are arranged in a way that they are easy to read.
