

The image displays a 20x20 grid of 400 small clusters of black dots. Each cluster represents a unique number, ranging from 0 to 999. The clusters are arranged in a grid where the first 10 columns represent the hundreds digit (000-900) and the last 10 columns represent the tens and units digits (00-99). The number of dots in each cluster corresponds to the number it represents, with some numbers having multiple representations (e.g., 1000 dots for 1000, 1001 dots for 1001, etc.).
