

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in a 2x5 grid within each cell. The patterns are organized into four groups of 25, corresponding to the four quadrants of the 10x10 grid. The patterns are arranged in a way that they represent all possible combinations of 10 binary digits, from 0000000000 to 1111111111.

The figure consists of four separate dot plots arranged horizontally, labeled \$k=0\$, \$k=1\$, \$k=2\$, and \$k=3\$. Each plot has an x-axis from 0 to 8 and a y-axis from 0 to 10. The dots represent the frequency of each value.
