

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique visual representation of a 10-bit binary string. The patterns are arranged in 10 rows and 10 columns, with each row containing 10 patterns and each column containing 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string. The patterns are arranged in a grid where each row contains 10 patterns and each column contains 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string.

Figure 1 illustrates the layout of the 1000 Genomes Project. It includes a map of the world showing sampling locations, a list of populations, and a table of sample sizes for each population.

Population	Sample Size
CEU	100
CHB	100
CHS	100
YRI	100
FIN	100
GBR	100
IBS	100
CEU+CHB+CHS	100
YRI+FIN	100
GBR+IBS	100
CEU+CHB+CHS+YRI+FIN	100
GBR+IBS+YRI+FIN	100
CEU+CHB+CHS+YRI+FIN+GBR+IBS	100
