

A large grid of 100 rows and 100 columns of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The dots are small and black, and the background is white. The pattern is dense in some areas and sparse in others, creating a complex, abstract visual structure.

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a 5x5 arrangement of dots, where each dot is either present (1) or absent (0). The patterns are arranged in rows and columns, with each row and column containing a unique set of patterns. The patterns are generated by a simple algorithm, such as a random number generator or a pseudorandom number generator, to create a diverse set of visual representations for binary data.
