

A 20x20 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern that roughly forms a large, stylized letter 'A' or a similar abstract shape. The pattern is denser in the center and tapers off towards the edges. The dots are small and black, set against a plain white background.

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a 10x10 grid of dots, where each dot is either present (1) or absent (0). The patterns are arranged in a grid where each row and column contains all possible combinations of the 10 digits. This is a visual representation of the Cartesian product of 10 binary choices, resulting in 1024 unique patterns arranged in a 32x32 grid. The patterns are arranged in a grid where each row and column contains all possible combinations of the 10 digits.

[illegible]

A 3x3 grid of dots. The top row has three dots. The middle row has three dots. The bottom row has two dots, with the leftmost position empty.
