

[illegible]

Figure 1 displays a 2x12 grid of point patterns. The top row contains 12 patterns, and the bottom row contains 12 patterns. The patterns are arranged in a grid, with each pattern consisting of a set of points (dots) on a white background. The patterns vary in complexity and shape, representing different realizations of a point process.

A 3x10 grid of 30 small clusters of black dots. Each cluster represents a different pattern of points, likely generated by a random process. The patterns vary in size, shape, and density, showing a wide range of possible outcomes from a single trial.

The image displays a 7x10 grid of 70 small dot patterns. Each pattern is a 3x3 arrangement of dots, where each dot is either present or absent, representing a unique combination of the seven basic dot patterns (1-7) defined in the legend. The patterns are arranged in rows and columns, showing all possible combinations of the seven basic patterns.
