

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique visual representation of a 10-bit binary string. The patterns are arranged in a grid where each row contains 10 patterns and each column contains 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string. The patterns are arranged in a grid where each row contains 10 patterns and each column contains 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string.

A 7x10 grid of dots forming a stylized representation of the word "HELLO". The dots are arranged in a way that the word is easily recognizable, with each letter formed by a unique pattern of dots.

[illegible]

A 3x3 grid of dots. The top row has two dots, the middle row has two dots, and the bottom row has two dots. The dot in the top-right position is missing.

A 2x10 grid of 20 small clusters of black dots. Each cluster represents a different pattern of points. The patterns vary in the number of points (ranging from 3 to 10) and their spatial arrangement (e.g., linear, triangular, rectangular, scattered).
