

[illegible]

The image displays a 5x5 grid of 25 dot patterns. Each pattern is a 5x5 grid of dots, where a black dot represents a value of 1 and a white dot represents a value of 0. The patterns are arranged in five rows and five columns, showing various combinations of black and white dots. The patterns are as follows:

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique visual representation of a 10-bit binary string. The patterns are arranged in a grid where each row contains 10 patterns and each column contains 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string. The patterns are arranged in a grid where each row contains 10 patterns and each column contains 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string.
