

The image displays a 100x100 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows containing more dots than others. The overall distribution of dots is non-uniform, suggesting a complex, non-random structure. The dots are arranged in a way that suggests a specific data set or a visual encoding of information.

The image displays a 7x8 grid of 56 small dot patterns. Each pattern is a 7x7 grid of dots, where each dot is either black or white, representing a binary matrix. The patterns are arranged in 7 rows and 8 columns, showing a variety of configurations. Some patterns are sparse, while others are more dense. The patterns are arranged in a way that suggests a systematic enumeration of all possible 7x7 binary matrices, although the specific order is not explicitly stated.
