

This image displays a 100x100 grid of Braille characters. Each character is a Braille cell, formed by a combination of dots 1 through 6. The grid is organized into four main quadrants, each containing a 50x50 sub-grid. The Braille characters are arranged in a pattern that resembles a multiplication table, with the product of the row and column indices (from 1 to 100) represented in Braille. The grid is organized into four main quadrants, each containing a 50x50 sub-grid. The Braille characters are formed by dots 1 through 6, with the number of dots corresponding to the value of the cell in the grid.

[illegible]

A 20x20 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The overall shape is roughly rectangular, with the dots concentrated in the center and fewer dots towards the edges. The pattern appears to be a random or semi-random distribution of points.
