

A 10x10 grid of 100 small clusters of black dots, each cluster representing a different number from 0 to 99. The clusters are arranged in a grid where the first column shows numbers 0-9, the second column shows 10-19, and so on, up to the tenth column showing 90-99. Each cluster is a unique pattern of dots, with some numbers having a single dot and others having many dots in various arrangements.

The image displays a 7x10 grid of 70 small dot patterns. Each pattern consists of 7 dots arranged in a 3x3 grid, with the center dot always being active. The patterns represent all possible combinations of the 6 surrounding dots being active or inactive, totaling 2^6 = 64 patterns. The grid is organized into 7 rows and 10 columns, with the last 6 patterns in the last row being missing, leaving 64 patterns in total.

A 3x3 grid of dots. The top row has three dots. The middle row has two dots, with the rightmost position empty. The bottom row has two dots, with the rightmost position empty.
