

A 20x20 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The dots are small and black, and the grid is composed of 20 rows and 20 columns. The pattern of dots is not uniform, with some areas being more densely populated than others. The dots are scattered across the grid, with some appearing in small clusters and others in isolation. The overall effect is a random-looking distribution of points within a defined rectangular area.

A 15x15 grid of 225 small clusters of black dots, each cluster representing a different number from 0 to 999. The clusters are arranged in a grid where the first column shows numbers 0-9, the second column shows 10-19, and so on, up to the 15th column showing 220-229. Each cluster is a unique arrangement of dots, with some numbers having a single dot and others having many dots in various patterns.
