

A 20x20 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The dots are small and black, and the grid is composed of 20 rows and 20 columns. The pattern of dots is non-uniform, with some areas being denser than others. The dots are scattered across the grid, with some appearing in small clusters and others in isolation. The overall appearance is that of a random or semi-random distribution of points within a defined square area.

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in a 2x5 grid of dots. The patterns are organized into four groups of 25, corresponding to the four 2-bit binary values (00, 01, 10, 11) in the first two bits of the 10-bit sequence. The patterns are arranged in a way that visually represents the binary sequence 0001011011, which is the binary representation of the decimal number 91.
