

A 4x10 grid of 40 small clusters of black dots, each forming a different abstract pattern. The patterns vary in complexity, from simple pairs of dots to dense, interconnected shapes.

The figure displays a 4x10 grid of 40 small diagrams, each showing a different arrangement of black dots on a white background. The dots are arranged in various patterns, including lines, clusters, and geometric shapes, representing different states or configurations.

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in a 2x5 grid of dots. The patterns are organized into four groups of 25, corresponding to the four quadrants of the 10x10 grid. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number.

A 10x10 grid of 100 small clusters of black dots, each cluster representing a different number from 0 to 99. The clusters are arranged in a grid where the first column shows numbers 0-9, the second column shows 10-19, and so on, up to the tenth column showing 90-99. Each cluster is a unique pattern of dots, with some numbers having a single dot and others having many dots in various arrangements.

A 10x10 grid of 100 small dot patterns, each representing a unique combination of the 10 digits (0-9). The patterns are arranged in a 10x10 grid, with each row and column containing all 10 digits exactly once. The patterns are small, black, and pixelated, resembling a low-resolution font or a digital display.

The figure consists of 10 sub-diagrams arranged in a single row, each showing a pattern of black dots on a white grid. The patterns evolve from left to right, starting with a small cluster of 5 dots and growing into a larger, more complex shape of 25 dots by the final diagram.

A 3x3 grid of dots. The dots are arranged in three rows and three columns. The bottom-left dot is missing, leaving 8 dots in total.

The image shows three dot patterns. The first pattern, representing the number 1, consists of 5 dots arranged in a cross shape. The second pattern, representing the number 2, consists of 10 dots arranged in a shape resembling a '2'. The third pattern, representing the number 3, consists of 10 dots arranged in a shape resembling a '3'.
