

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in a 2x5 grid of dots. The patterns are organized into four groups of 25, corresponding to the four quadrants of the 10x10 grid. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number. The patterns are arranged in a way that they can be read as a sequence of 100 binary digits, which can be converted into a decimal number.

A 10x10 grid of 100 small, stylized human figures. Each figure is composed of black dots on a white background, arranged in a way that suggests a person's outline. The figures are arranged in a grid, with some figures appearing to be in motion or in different poses, creating a sense of a crowd or a group of people.

The figure displays a 3x10 grid of 30 distinct dot patterns. Each pattern is composed of black dots arranged in a specific spatial configuration on a white background. The patterns vary in complexity and shape, ranging from simple clusters to more intricate, interconnected forms. The grid is organized into three rows and ten columns, with each cell containing one unique dot pattern.

A 10x10 grid of 100 small dot patterns, each representing a unique combination of the 10 digits (0-9). The patterns are arranged in a 10x10 grid, with each row and column containing all 10 digits exactly once. The patterns are small, black, and pixelated, resembling a low-resolution font or a digital display.

The figure consists of 10 diagrams arranged in two rows of five. Each diagram shows a pattern of black dots on a grid. The pattern starts as a small cluster of dots in the first diagram and grows into a larger, more complex shape in the subsequent diagrams. The dots are arranged in a way that suggests a sequence of growth or transformation.

A 3x3 grid of dots. The dots are arranged in three rows and three columns. The bottom-left dot is missing, leaving a 2x2 square of dots in the bottom-right corner.

The image shows three dot patterns. The first pattern, representing the number 1, consists of 5 dots arranged in a cross shape. The second pattern, representing the number 2, consists of 10 dots arranged in a shape resembling a '2'. The third pattern, representing the number 3, consists of 10 dots arranged in a shape resembling a '3'.

Figure 1 consists of five diagrams labeled (a) through (e), each showing a different type of point pattern. (a) shows a regular grid of points. (b) shows a random distribution of points. (c) shows a clustered distribution of points. (d) shows a distribution of points with a central cluster. (e) shows a distribution of points with a central cluster and a tail.

The image displays a 4x10 grid of 40 small, abstract black-and-white patterns. Each pattern is a unique arrangement of black dots on a white background, forming shapes that resemble stylized letters or symbols. The patterns are organized into four rows and ten columns. The first row contains patterns that look like 'a', 'b', 'c', 'd', 'e', 'f', 'g', 'h', 'i', and 'j'. The second row contains patterns that look like 'k', 'l', 'm', 'n', 'o', 'p', 'q', 'r', 's', and 't'. The third row contains patterns that look like 'u', 'v', 'w', 'x', 'y', 'z', and several variations of '0' and '1'. The fourth row contains patterns that look like '2', '3', '4', '5', '6', '7', '8', '9', and several variations of '0' and '1'. The patterns are arranged in a way that suggests a sequence or a code.

The image displays a 15x15 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, forming a complex, non-random structure. The dots are arranged in a way that suggests a complex, non-random structure, possibly representing a specific data set or a stylized image.

Figure 1 consists of eight sub-diagrams, labeled (a) through (h), each showing a 3x3 grid of points. The points are represented by solid black dots and open circles. The configurations are as follows:

- (a) Top row: solid, solid, solid; Middle row: solid, solid, solid; Bottom row: solid, solid, solid.
- (b) Top row: solid, solid, solid; Middle row: solid, solid, solid; Bottom row: solid, solid, solid.
- (c) Top row: solid, solid, solid; Middle row: solid, solid, solid; Bottom row: solid, solid, solid.
- (d) Top row: solid, solid, solid; Middle row: solid, solid, solid; Bottom row: solid, solid, solid.
- (e) Top row: solid, solid, solid; Middle row: solid, solid, solid; Bottom row: solid, solid, solid.
- (f) Top row: solid, solid, solid; Middle row: solid, solid, solid; Bottom row: solid, solid, solid.
- (g) Top row: solid, solid, solid; Middle row: solid, solid, solid; Bottom row: solid, solid, solid.
- (h) Top row: solid, solid, solid; Middle row: solid, solid, solid; Bottom row: solid, solid, solid.

A 5x10 grid of 50 small clusters of black dots. Each cluster is a unique arrangement of dots, ranging from a single dot to a small group of up to 10 dots. The patterns are abstract and vary significantly across the grid, representing a diverse set of visual stimuli.
