

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in four groups of 25, corresponding to the four quadrants of the 10x10 grid. The patterns are arranged in a way that suggests a binary code, where the position of the dots represents the value of each bit (1 for dot, 0 for no dot).

A 3x3 grid of dots. The top row has three dots. The middle row has two dots, with the rightmost position empty. The bottom row has two dots, with the leftmost position empty.
