

This image displays a 16x16 grid of 256 small clusters of black dots on a white background. Each cluster represents a unique arrangement of dots, corresponding to a number from 0 to 255. The clusters are arranged in a grid where the number of dots increases from top-left to bottom-right. The clusters are arranged in a grid where the number of dots increases from top-left to bottom-right. The clusters are arranged in a grid where the number of dots increases from top-left to bottom-right.

A 3x10 grid of 30 small clusters of black dots. Each cluster is a unique arrangement of dots, ranging from simple pairs to complex, multi-pointed star-like shapes. The patterns are distributed across three rows and ten columns.
